01) Introduction

Dr. Dimitris Kavroudakis is an assistant professor of ‘Geographical Analysis’ in the Geography Department, University of the Aegean. He has studied computer info systems in the [American College of Greece](#) (DEERE), Geography in [The University of the Aegean](#) and he obtained his MSc in GIS from the [University of Leeds](#), UK. He holds a PhD in Geography from the [University of Sheffield](#), UK and has worked as post-doc researcher in [UCL \(CASA\)](#), [University of Sheffield](#) and [The University of the Aegean](#). Over the years, he has been involved in high quality geographical research which led to a number of scientific publications in the field. Some of his academic interests include location analysis, spatial analysis, network analysis, GIS, open source and economic geography. He has been involved in research concerning: Spatial Analysis, Geocomputation, Spatial Statistics, Location Analysis, Web-GIS, Data Mining and Open Source GIS development. He uses new approaches in geographical analysis such as Artificial Intelligence and Agent Based Modelling and supports new computational approaches such as Grid Computing and large scale distributed modelling. Dimitris is an experienced programmer and a Linux/Open-Source supporter utilizing Open Hardware such as Raspberry-PI and Android OS.
